Portfolio

PROFESSIONAL SUMMARY

Computer Science undergraduate and Google Gemini Student Ambassador building production-oriented Generative AI, cloud, and full-stack applications with Python, TypeScript, FastAPI, React, and Google Cloud. Data Analyst Intern at Bluestock Fintech building SQL-based analytics pipelines. AWS Certified Solutions Architect – Associate.

EDUCATION

B.Tech, Computer Science and Engineering | DVR & Dr. HS MIC College of Technology 2024 – 2028 (Expected)

CGPA: 7.3/10 | Coursework: Data Structures and Algorithms, OOP, DBMS, Software Engineering

TECHNICAL SKILLS

Languages: Python, Java, C/C++, JavaScript, TypeScript, SQL

AI / GenAI: Generative AI, Google Gemini API, Vertex AI, Prompt Engineering

Web / Backend: React, FastAPI, Flask, REST APIs, Streamlit, HTML, CSS

Cloud / DevOps: AWS, Google Cloud, Cloud Run, Docker, Render, Vercel

Data / Databases: SQL, MySQL, SQLite, SQLAlchemy, Firestore, Firebase, Pandas, NumPy

Developer Tools: Git, GitHub, Vite, Vitest, pytest, VS Code

Computer Science: Data Structures and Algorithms, OOP, DBMS, SDLC

EXPERIENCE

Google Gemini Student Ambassador | Google, India May 2026 – Present

- Selected through a multi-stage evaluation to represent Google Gemini in the Student Ambassador program.
- Represent Gemini on campus through workshops and developer sessions on AI application development.

Data Analyst Intern | Bluestock Fintech, Remote Sep 2026 – Oct 2026

- Built an end-to-end mutual fund analytics pipeline in Python and SQL, generating synthetic datasets (50,000 transactions, 2,000 investors, 12,000+ NAV rows) and integrating live AMFI NAV data for 6 scheme codes.
- Cleaned and validated all datasets using forward-fill, deduplication, KYC flagging, and expense-ratio cap checks.

SELECTED PROJECTS

CivicPulse AI | Multilingual Civic Decision-Intelligence Platform

GitHub

Live Demo

React, TypeScript, Vite, FastAPI, Python, Gemini API, pytest

- Built an open-source platform that turns multilingual citizen requests into evidence-backed infrastructure priorities, using Gemini for language detection, translation, and intent and urgency extraction.
- Engineered a deterministic scoring engine (35% demand, 25% infrastructure gap, 20% demographic vulnerability, 20% investment overlap) with a six-step evidence trail, keeping AI separate from scoring logic.
- Implemented an anti-fake-closure workflow as a state machine with Gemini-based validation and a rule-based fallback; validated with 37 passing pytest tests on a 35-district dataset.

Mutual Fund Analytics Platform | Bluestock Fintech Capstone

GitHub

Live Demo

Python, SQL, SQLite, SQLAlchemy, Pandas, Streamlit, AMFI API

- Designed a 9-table SQLite star schema loaded through SQLAlchemy (86,000+ rows) and produced 15 exploratory charts and 10 business SQL queries.
- Computed CAGR, Sharpe, Sortino, Alpha/Beta, maximum drawdown, and VaR/CVaR, and delivered a four-page interactive Streamlit dashboard and a risk-appetite fund recommender.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate** | Amazon Web Services, 2026
- Google AI Essentials**, **Google Prompting Essentials**, and **Google Cloud Gen AI Academy APAC (Cohort 3)** | 2026
- AI Readiness – Foundation Course** | IICT and AI Skills House with Google, Sep 2026 (ID: IICT-19052613476)

VIRTUAL EXPERIENCE AND ACHIEVEMENTS

- Job Simulations (Forage, 2026):** JPMorgan Chase & Co. Software Engineering; Walmart Global Tech Advanced Software Engineering; Tata iQ GenAI-Powered Data Analytics.
- Selected for the Grand Finale of the Anvil Hackathon (Scaler School of Technology); participated in 6+ hackathons.
- Google Solution Challenge 2026 (BiasGuard AI); PromptWars Virtual Challenge 3 Certificate of Achievement.
